

VIKAS ATHYA

Software Engineer • Full-Stack • MERN Stack • Open to Relocation & Remote

📞 +91-9109318503 | ✉️ vikaaathya.info@gmail.com | linkedin.com/in/vikasathya | 📍 Damoh, MP |

PROFESSIONAL SUMMARY

Final-year B.Tech (IT) student and Software Engineer with hands-on, production experience building scalable full-stack web applications using the MERN stack across two industry roles and multiple end-to-end projects. Improved system reliability across production environments. Adept at architecting RESTful APIs, implementing secure authentication flows, and translating business requirements into clean, maintainable code. Seeking a Software Engineer role where I can contribute to high-impact products while growing into a senior technical contributor

SKILLS

- **Languages** :HTML, CSS, JavaScript, C++, Python, Java
- **Frameworks & Libraries** : React.js, Node.js, Express.js, Flask, Bootstrap
- **Database** : MongoDB, MySQL
- **Core Concepts**: DSA, OOP, MVC Architecture, Full-Stack Development, Responsive Design, AES
- **Tools and Platform** : ChatGPT, Gemini, Claude, Git, GitHub, VS Code, Postman, REST APIs
- **Soft Skills** : Communication, Problem-Solving, Adaptability & Continuous Learning. Patience

PROFESSIONAL EXPERIENCE

Web Developer | EM Technology — Sagar, MP (Remote)

Mar 2024 – jun 2024

- Engineered 2+ responsive React.js SPAs and RESTful APIs using Node.js/Express, reducing average API response time by ~20% through route optimization and middleware refactoring.
- Optimized frontend asset delivery (lazy loading, code splitting, CDN caching), improving page load time by 30% and boosting Lighthouse performance score from ~40 to ~55.
- Designed and maintained MongoDB schemas for 3 client projects, implementing indexing strategies that reduced query execution time by ~15%.
- Collaborated directly with clients to translate requirements into technical specs, reducing revision cycles by 40% through proactive stakeholder communication.

Web Developer | Arabhya Foundation - Damoh, MP

Mar 2025 - Sept 2025

- Led refactoring of 2,000+ lines of legacy jQuery code into modular React components, improving code maintainability score (SonarQube) by 25%.
- Resolved 12+ critical cross-browser compatibility and mobile responsiveness bugs across Chrome, Firefox, and Safari, achieving consistent rendering on 95%+ of target devices
- Introduced structured QA checklists and regression testing protocols, reducing post-deployment bug reports by 50% within 2 sprint cycles.
- Mentored 2 junior interns on Git workflows and component architecture best practices

Python Development | Mind Coder – Indore, MP

Sept 2025 – Oct 2025

- Developed a full-stack Task Management System using Python, Django, HTML, CSS, JavaScript, and MySQL.

- Implemented user authentication and CRUD operations for creating, updating, deleting, and managing tasks.
- Added features such as task priority, deadlines, status tracking, and responsive UI for better user experience.
- Built RESTful APIs and database integration with a focus on security, structured architecture, and maintainable code.

KEY POINTS

WebNotes — Full-Stack Note-Taking Application • React.js, Node.js, Express.js, MongoDB, JWT

- Developed end-to-end: user authentication (JWT + bcrypt), CRUD operations, and a responsive UI — shipped as a production-ready application with under 5 reported bugs post-launch.
- Designed RESTful API with 12 endpoints following REST best practices; API documentation written in Postman.

Browser-Based Multi-Language Code Compiler • Python, Flask, C++, React.js, Docker

- Architected and deployed a full-stack in-browser IDE supporting Python and C++ with live execution —a rare, differentiated project demonstrating systems-level thinking.
- Implemented sandboxed execution environments using process isolation, ensuring zero cross-user data leakage and handling 50+ concurrent execution requests in testing.
- Built real-time output streaming via WebSockets, reducing perceived latency by ~60% versus polling-based alternatives.

Smart Task Management System – Python, Django, HTML, CSS, JavaScript, and MySQL

- Implemented user authentication and CRUD operations
- Added features such as task priority, deadlines, status tracking, and responsive UI for better user experience.
- Built RESTful APIs and database integration.

EDUCATION

Indira Gandhi Engineering College, Sagar

June 2023 – Present (Final Year)

B.Tech in Information Technology

- Relevant Coursework: Data Structures & Algorithms, Web Technologies, Operating Systems, DBMS, Computer Networks

CERTIFICATIONS & LEARNING

- Web Developer – Arabhya Foundation
- Python Developer – Mind Coders

PERSONAL INTERESTS, STRENGTHS & ADDITIONAL

- Strengths : Problem Solving, Adaptability, Teamwork and Creativity.
- Interests : Learning about web development trends, strategic gaming and open-source contributions.
- Open to relocation across India and remote/hybrid opportunities globally.
- Languages: Hindi (Native), English (Professional Working Proficiency)
